

I purchased an HDTV early this year with great expectations, supporting the HD industry which has helped to build HD programming which supports the film makers.

Now they want to change to a different format so my HDTV (cost \$8500.00) will not be able to receive HD Broadcast.

This is un-fair! I dont mind a change in format, however all HDTV's and receivers made and sold prior to the change should be grandfathered without extra costs.
